ACCOUNTING FOR SPIRITS

§ 19.980 Gauging.

(a) *Equipment and method.* Proprietors shall gauge spirits by accurately determining the proof and quantity of spirits. The proof of the spirits shall be determined using a glass cylinder, hydrometer, and thermometer. Proprietors may account for fuel alcohol in wine gallons. Unless proprietors desire to do so, it is not necessary to determine the proof of fuel alcohol manufactured, on-hand, or removed. The Proprietor may determine quantity either by volume or weight. A tank or receptacle with a calibrated sight glass installed, a calibrated dipstick, conversion charts, meters (subject to approval by the appropriate TTB officer, or other devices or methods approved by the appropriate TTB officer, may be used to determine quantity by volume. The proprietor shall ensure that hydrometers, thermometers, and other equipment used to determine proof, volume, or weight are accurate. From time to time appropriate TTB officers shall verify the accuracy of such equipment. Detailed procedures for gauging spirits are provided in 27 CFR part 30.

(b) *When Required.* Proprietors shall gauge spirits and record the results in their records at the following times:

- (1) On completion of production of distilled spirits;
- (2) On receipt of spirits at the plant;
- (3) Prior to the addition of materials to render the spirits unfit for beverage use;
- (4) Before withdrawal from plant premises or other disposition of spirits (including fuel alcohol); and
- (5) When spirits are to be inventoried.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1356, as amended, 1358, as amended (26 U.S.C. 5201, 5204))

§ 19.981 Inventories.

Proprietors shall take actual physical inventory of all spirits (including fuel alcohol) on bonded premises at least once during each period for which a report is required by § 19.988. The results of the inventory shall be posted

§ 19.982

in the applicable records required by § 19.982.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1356, as amended (26 U.S.C. 5201))

§ 19.982 Records.

(a) *All plants.* All proprietors shall maintain records with respect to: (1) The quantity and proof of spirits produced; (2) The proof gallons of spirits on-hand and received; (3) The quantities and types of materials added to render the spirits unfit for beverage use; (4) The quantity of fuel alcohol manufactured; and, (5) All dispositions of spirits (including fuel alcohol). Fuel alcohol may be recorded in wine gallons.

(b) *Medium and large plants.* Proprietors of medium and large plants shall also record the kind and quantity of materials used to produce spirits.

(c) *General requirements.* (1) The records must contain sufficient information to allow appropriate TTB officers to determine the quantities of spirits produced, received, stored, or processed and to verify that all spirits have been lawfully disposed of or used.

(2) Records which the proprietor prepares for other purposes (i.e. invoices or other commercial records) may be used to meet the record requirements of this subpart, so long as they show the required information.

(3) Where the format or arrangement of the record is such that the information is not clearly or accurately reflected, the appropriate TTB officer may require a format or arrangement which will clearly and accurately reflect the information.

(4) Entries required by this subpart to be made into records will be made on the day on which the operation or transaction occurs. However, these entries may be deferred until the third business day succeeding the day on which the operation or transaction occurs when the proprietor prepares commercial records concurrent with the individual operation or transaction.

27 CFR Ch. I (4-1-10 Edition)

§ 19.983 Spirits rendered unfit for beverage use in the production process.

Where spirits are rendered unfit for beverage use before removal from the production system, the proprietor shall enter into the production records, in addition to the quantity and proof of spirits produced, the kind and quantity of materials added to each lot of spirits. In such a case, a separate record under § 19.985 is not required. The quantity of spirits produced will be determined by subtracting the quantity of materials added to render the spirits unfit for beverage use from the quantity of fuel alcohol produced and multiplying the resulting figure by the proof of each lot of spirits. The proprietor shall determine the proof of each lot of spirits. The proprietor shall procure a representative sample of each lot, prior to the addition of any material for rendering the spirits unfit for beverage use, and proof the sample in accordance with the provisions of § 19.980(a). This paragraph applies to in-line addition of materials and to systems in which, before any spirits come off the production equipment, the proprietor adds materials for rendering the spirits unfit for beverage use to the first receptacle where spirits are to be deposited.

(Sec. 807, Pub. L. 96-39, 93 Stat. 284 (26 U.S.C. 5207); sec. 232, Pub. L. 96-222, 94 Stat. 278 (26 U.S.C. 5181))
